

ASSEMBLAGE SIDE TABLE

by Fort Standard

Shown by Patrick Parish Gallery, the Assemblage side table is a part of the "Qualities of Material" collection, made from many thin, hard maple slats. The slats are assembled into triangular tubes used to create the hollow top surface and hexagonal legs. fortstandard.com

A COUTURE ARMCHAIR

by Färg & Blanche for Barcelona Design

Färg & Blanche design studio based in Stockholm, known for something called Wood Tailoring, designed the Couture armchair for Barcelona Design. Using the technique, which needs great artisanal ability, sewing machines can be used on hard materials like wood to join different parts, giving the pieces their own aesthetic value while offer surprising and suggestive results. fargblanche.com

POLYMORPH CHAIR

by Philipp Aduatz

In the ancient Greek language "poly" means "many" and "morph" stands for "shape" and here refers to a design of multiple concepts that fuse together into a unified single shape. The design is based on different languages of form that have emerged over time, there are two basic ideas recognizable: Minimalist, linear and functional shapes on one hand, and organic and spherical forms inspired by nature on the other hand. philippaduat.com
