

VILLARCEAU TABLE

By Philipp Aduatz

The design of the Villarceau Table is based on the principle of the Villarceau circles. First, the basic dimensions and proportions of the torus were determined. Then it was sliced by a bitangent plane to generate the Villarceau Circles. By rotating the circles around the center of the torus a pattern of interconnected circles emerged. philippaduat.com

SPIRAL MIRROR

by Ryosuke Fukusada for Bonaldo

This mirror is inspired by spiral cord which is often seen along a edge of fabric, felt and leather products to sew it on and make it robust. This spiral cord protects the edge of the mirror and becomes a strong element of the piece. In addition, the cord gives softness and playful colors to the mirror. bonaldo.it
